# Livestock Future Expo & Conf.

مؤتمر ومعرض مستقبل الثروة الحيوانية

**28-30 March 2027**

Riyadh Int. Conv. & Exhibition Center  
Riyadh - Kingdom of Saudi Arabia

Under the patronage of  
His Excellency Eng.

## Abdulrahman Abdulmohsen AlFadley

Minister of Environment, Water and Agriculture  
Chairman of the Board of Directors of the National Livestock & Fisheries  
Development Program

Under the Supervision of  
National Livestock & Fisheries Development Program

The Livestock Future Expo & Conference 2027 will be held for the first time in the Kingdom of Saudi Arabia, in Riyadh. It is the premier platform dedicated to advancing and showcasing investment and innovation opportunities in livestock processed products.

The event brings together producers, manufacturers, investors, technology providers and industry experts under one roof to explore the latest industrial solutions, strengthen value chains, and foster partnerships that contribute to building a more sustainable and profitable future for this vital sector in the Kingdom of Saudi Arabia.

# Why Saudi Arabia?

Saudi Arabia is undergoing a significant transformation in its livestock sector, with national strategies focused on maximizing the economic value of livestock resources through the development of livestock processed products. This approach contributes to enhancing food security, diversifying sources of income and supporting the objectives of Saudi Vision 2030.

The livestock processed products sector is considered one of the most promising industries, offering substantial investment and industrial opportunities through the full utilization of animal resources and their conversion into high-value food, industrial and commercial products. These processed products are derived from meat, cattle, camels, sheep, poultry, fish, dairy products and hides and skins.

# Why is the world investing in Saudi Arabia's livestock processed products sector?

## First: Saudi Vision 2030

Supporting the development of food and processed products and increasing their contribution to GDP

Enhancing economic sustainability and maximizing the utilization of local resources

Encouraging innovation and advanced technologies within the livestock sector and its related industries

## Second: Strong Government Support for Investment

Incentives and facilitation programs for local and international investors

Financing and support programs through government entities and development funds

An attractive environment that promotes the growth of food processing and manufacturing industries

## Third: A Growing Consumer Market

Increasing demand for processed and premium-quality food products

Growth in the food and beverage sector driven by population growth and tourism expansion

Significant opportunities for expansion and export to regional and international markets

## Fourth: Strategic Location and Advanced Infrastructure

A modern logistics network connecting the Kingdom to key global markets

World-class transportation, port and airport infrastructure that supports industrial growth and export activities

Saudi Arabia's position as a regional hub linking Asia, Africa and Europe, enabling efficient access to international markets

# Conference & Expo Objectives

Focus on the future development and advancement of livestock processed products industries in the Kingdom.

Establishing an international platform that brings together policymakers, investors, experts, and technology companies to advance livestock value chains.

Exploring the latest global technologies in food manufacturing, animal genomics, biotechnology, and sustainability.

Promoting investment opportunities and strategic partnerships between the public and private sectors, as well as with global companies.

Supporting the transition to a circular economy through enhanced utilization of animal by-products and waste.

Enabling research and development and facilitating the transfer of knowledge and advanced technologies to the Saudi and regional markets.

Supporting the growth of small and medium-sized enterprises and entrepreneurs in the livestock and value-added processing sectors.

Strengthening collaboration among academia, research institutions, and the processing industry to develop sustainable solutions for the future.

Future Expo & Conf.  
مؤتمر وعرض مستقبل التروة الحيوانية

# Conference by Numbers

+35

Participating Countries

80

International and Local Speakers

25

Government Entities and Participating Organizations

06

Official Conference Sessions

15

Workshops

# Conference Topics

## Livestock Processed Products

Advancing livestock processed products to increase economic value and achieve long-term sustainability.

## Animal Protein Processing

Developing innovative animal protein products to meet market demands and strengthen food security.

## Veterinary Services

This topic focuses on the importance of disease prevention and treatment, as well as strengthening vaccination programs to protect livestock from epidemic and infectious diseases.

## Logistics Services

Enhancing logistics services to improve the transportation, distribution and market accessibility of livestock products efficiently and reliably.

## Showcasing Successful Local and International Experiences

Sharing success stories from livestock development projects that have contributed to the growth of the sector across different countries.

## Genomics and Its Applications in Livestock Improvement

This topic highlights the role of genomics in understanding the genetic makeup of animals and applying this knowledge to improve productivity, health, and breeding outcomes through smart crossbreeding, genetic selection and advanced biotechnology solutions.

# 02 The Expo

International & local  
companies

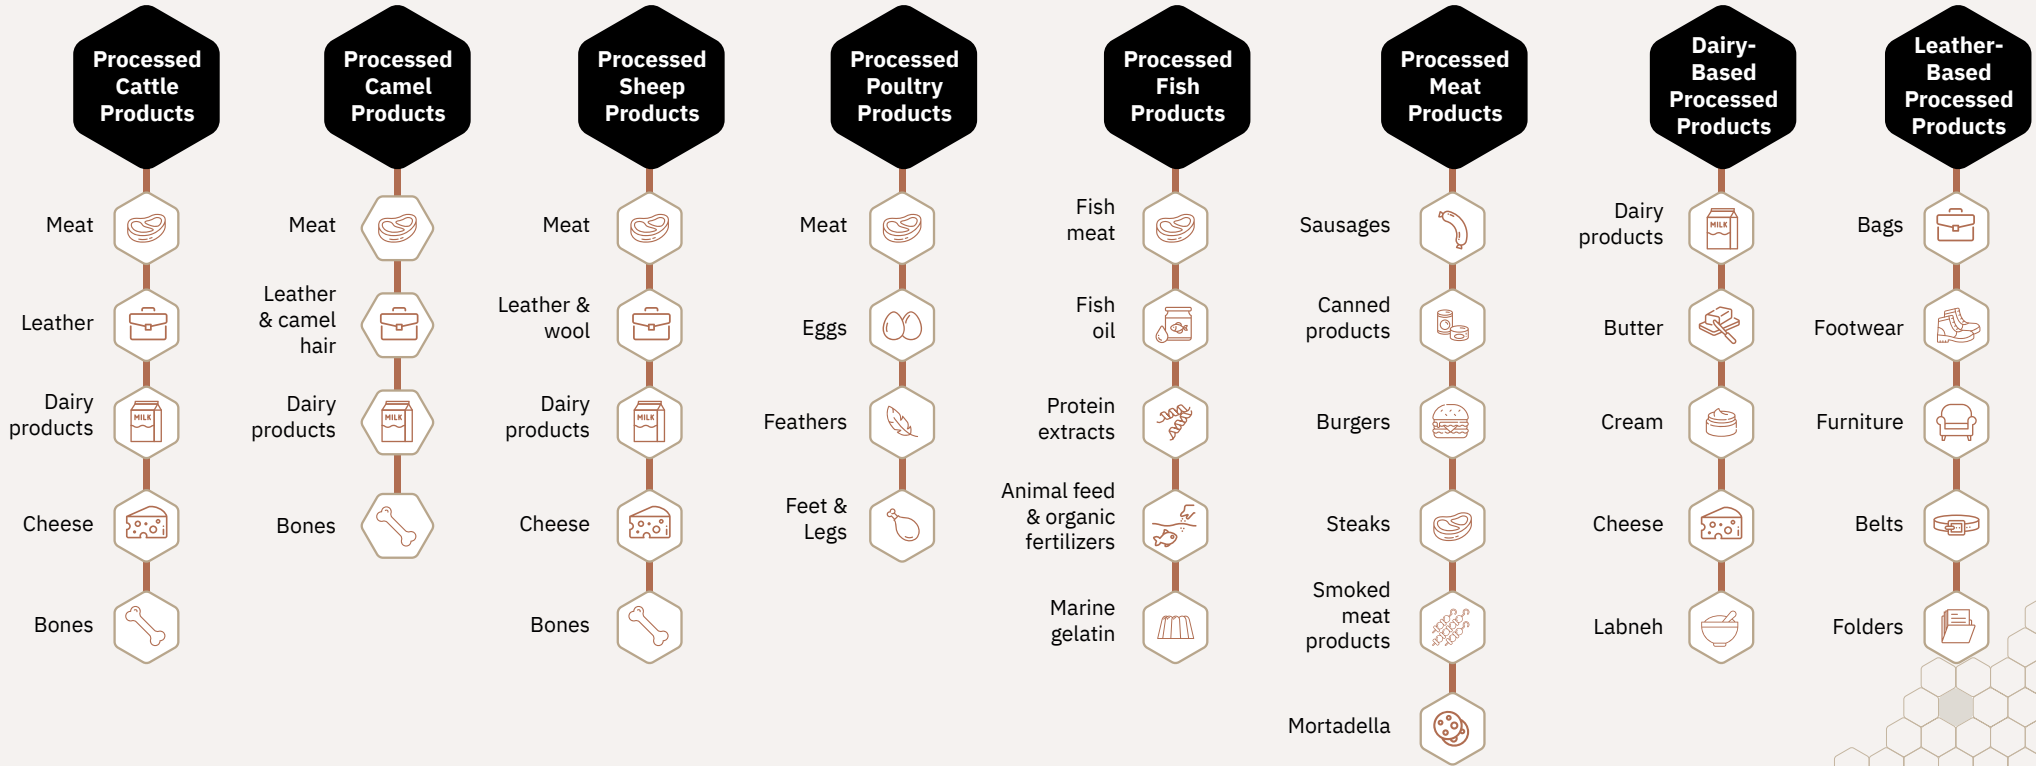

Government &  
semi-government  
entities

International & regional  
organizations

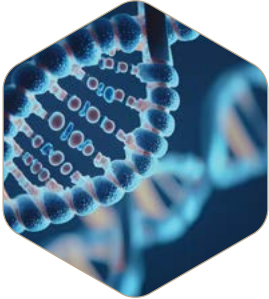

# Target Sectors

## First: Animal Processing Products

# Target Sectors

## Second: Livestock Production and Genetic Improvement

- Modern Breeding Technologies and Smart Farm Management
- Artificial Insemination and Embryo Transfer Centers
- Animal Genetic Improvement and Breeding Centers
- Resource Sustainability and Productivity Enhancement Centers
- Genomics and Artificial Intelligence Applications in Livestock Production

## Third: Veterinary Health and Pharmaceutical Technologies

- Biosecurity, Traceability, and Animal Health Monitoring Companies
- Veterinary Vaccine, Pharmaceutical, and Advanced Therapeutic Technology Companies
- Veterinary Healthcare Services and Disease Prevention
- Epidemic Management and Enhancement of Animal Product Safety
- Laboratory Diagnostics and Veterinary Biotechnology Centers

## Fourth: Animal Nutrition and Feed

- Feed Additives and Animal Nutritional Supplements
- Sustainable Alternatives for Feed Ingredients
- Feed Manufacturing Companies and Feed Efficiency Solutions
- Livestock and Poultry Feed Marketing Companies
- Advanced Feed Manufacturing and Storage Technologies
- Precision Nutrition and Feed Conversion Efficiency Enhancement

## Fifth: Raw Animal Products

- Importers of Red and White Meat Products
- Companies Trading Local Red and White Meat Products

# Target Sectors

## Sixth: Slaughtering, Processing & Manufacturing Equipment

  
Meat and Dairy Processing  
Plant Equipment

  
Slaughtering, Skinning,  
and Meat Cutting Lines

  
Packaging and Packing  
Solutions for Meat and  
Dairy Products

  
Freezing and  
Rapid-Chilling  
Equipment

## Seventh: Farm Equipment and Technology

  
Cleaning and  
Sanitation  
Equipment

  
Farm Ventilation  
and Climate  
Control Systems

  
Cooling and  
Storage  
Equipment

  
Automated  
Milking  
Systems

  
Food Packaging  
and Filling  
Systems

  
Production  
Lines

  
Meat Cutting  
Machinery

  
Smart Farming  
Technologies (IoT)  
and GPS Livestock  
Tracking Solutions

## Eighth: Sustainability and Environmental Solutions

  
Renewable Energy  
Systems for Farms

  
Farm Waste Management  
and Organic Fertilizer  
Solutions

  
Emissions Reduction and Water  
Management Solutions

## Ninth: Services and Consultancy

  
Livestock  
Transportation and  
Logistics Companies

  
Livestock Insurance  
Companies

  
Agricultural and  
Bank Financing  
Services

  
Veterinary and  
Management Consultancy  
Services

  
Universities and  
Scientific Colleges

# Who Attends the Expo?

The expo attracts a broad spectrum of industry professionals through targeted promotional campaigns including senior executives, factory and operations managers, procurement specialists, engineers, researchers and other industry leaders from leading global companies involved in red and white meat processing, animal feed production and advanced livestock technologies.

To strengthen international participation, the exhibition collaborates with international trade associations, accredited embassies in the Kingdom, specialized media outlets and various strategic partners to attract high-quality buyers and decision-makers from around the world.

The Expo and Conference will provide a dynamic and knowledge driven platform for generating valuable business opportunities, building long term partnerships and connecting with industry leaders in one location.

- Academics, researchers and industry experts specializing in livestock and animal production from across the Kingdom and around the world
- Importers and suppliers of red and white meat products
- Meat processing and manufacturing companies
- Representatives of international and regional medical, veterinary and livestock organizations and associations
- Veterinarians and veterinary assistants from both public and private sectors, within and outside the Kingdom
- Business owners, senior executives, and decision-makers
- Manufacturers of veterinary medicines and vaccines from local and international markets
- Students and trainees from universities, colleges and specialized institutes both locally and internationally
- Livestock breeders and farm owners
- Government entities
- Investors and entrepreneurs
- Media professionals and stakeholders interested in health awareness
